

01 Executive scorecard

CEO-level view of growth, margin, risk, and action urgency

Revenue

16.4B VND

Official sales.csv total; reconciled to item grain.

Gross margin

13.8%

Margin is positive but thin for a fashion marketplace.

COD risk

24.9%

Cancellation plus return pressure in COD workflow.

Promo gap

1.3% vs 20.0%

Promotions protect volume but can destroy margin.

Last three years: rolling revenue and margin

Risk signals that require management action

Highest-value action queue

Priority	Signal / Entity	Recommended action
Critical	Overstock risk: SaigonFlex UM-43 (438)	Reduce receipts, bundle, or markdown products with excessive days of supply.
Critical	Overstock risk: SaigonFlex UM-96 (491)	Reduce receipts, bundle, or markdown products with excessive days of supply.
Critical	Overstock risk: VietMotion YY-05 (2396)	Reduce receipts, bundle, or markdown products with excessive days of supply.
Critical	Payment risk: cod	Use payment-specific incentives and controls; prioritize prepaid methods where risk is lower.

02 Predictive growth and seasonality

Historical EDA forecast, likely peak months, and planning lead indicators

Revenue trend and six-month predictive signal

Likely peak and soft months

Weekday demand index

Next forecast high

130.8M VND

Use as demand-planning pressure, not Kaggle forecast.

Peak month

May 1.53x

Replenish before peak demand windows.

Softest month

December 0.59x

Use markdowns and working-capital cleanup.

03 Profit and promotion leakage

Diagnostic view of where revenue growth stops converting into gross margin

Promo margin vs non-promo margin by category / segment

Margin leakage opportunity

Promoted margin

1.3%

Low margin means discounts need SKU and threshold controls.

Non-promo margin

20.0%

Baseline proves the business can sell with healthier margin.

Primary action

Tighten discount depth

Exclude low-margin SKUs and require minimum order value.

Recommended pricing controls

Priority	Signal / Entity	Recommended action
High	Promotion margin risk: Streetwear / Balanced	Tighten discount depth, exclude low-margin SKUs, or require higher minimum order value.
High	Promotion margin risk: Streetwear / Everyday	Tighten discount depth, exclude low-margin SKUs, or require higher minimum order value.
High	Promotion margin risk: Streetwear / Performance	Tighten discount depth, exclude low-margin SKUs, or require higher minimum order value.

04 Customer, channel, and payment risk

Revenue quality depends on payment workflow and channel mix, not only order volume

Payment-method risk rate

Channel margin and risk

Controls and budget-shift recommendations

Priority	Signal / Entity	Recommended action
Critical	Payment risk: cod	Use payment-specific incentives and controls; prioritize prepaid methods where risk is lower.
High	Channel quality risk: email campaign	Shift spend toward channels with stronger revenue quality and lower order risk.
Medium	Channel quality risk: organic search	Shift spend toward channels with stronger revenue quality and lower order risk.
Medium	Channel quality risk: referral	Shift spend toward channels with stronger revenue quality and lower order risk.

COD workflow

24.9%

Treat as higher-risk demand: verify, incentivize prepaid, and monitor refunds.

Quality metric

Margin + risk

Do not rank channels by sessions or order volume alone.

CEO decision

Spend shift

Move budget toward channels with stronger revenue quality.

05 Returns, reviews, and fulfillment

Customer-experience leakage concentrates in return reasons, size fit, and service timing

Top return reasons by returned orders

Category / size return pressure

Fulfillment timing vs return / cancellation rate

CX interventions

Priority	Signal / Entity	Recommended action
High	Wrong-size return risk: Streetwear / XL	Improve size guidance and target the worst category-size...
High	Wrong-size return risk: Streetwear / S	Improve size guidance and target the worst category-size...
High	Wrong-size return risk: Streetwear / M	Improve size guidance and target the worst category-size...

06 Inventory quadrant actions

Stockout and overstock can coexist; the action must depend on product-level risk

Inventory quadrant: stockout pressure vs overstock pressure

Stockout share

67.3%

Lost demand risk in product-month rows.

Overstock share

76.3%

Working capital tied up in slow movers.

Category stockout / overstock share

08 Prescriptive roadmap

CEO-ready action plan tied directly to descriptive, diagnostic, and predictive signals

Protect margin

Streetwear / Balanced

Risk 34.1

Tighten discount depth, exclude low-margin SKUs, or require higher minimum order value.
Estimated impact: 340.8M VND

Streetwear / Everyday

Risk 34.1

Tighten discount depth, exclude low-margin SKUs, or require higher minimum order value.
Estimated impact: 340.8M VND

Reduce failed demand

cod

Risk 50.7

Use payment-specific incentives and controls; prioritize prepaid methods where risk is lower.
Estimated impact: 249.2M VND

Fix customer leakage

Streetwear / XL

Risk 47.2

Improve size guidance and target the worst category-size combinations first.
Estimated impact: 47.2M VND

Streetwear / S

Risk 32.4

Improve size guidance and target the worst category-size combinations first.
Estimated impact: 32.4M VND

Balance inventory

HanoiStreet RP-08 (720)

Risk 36.6

Prioritize replenishment and allocation review for high-demand products with low fill rate.

HanoiStreet RP-07 (719)

Risk 34.4

Prioritize replenishment and allocation review for high-demand products with low fill rate.

Release capital

SaigonFlex UM-43 (438)

Risk 99.8

Reduce receipts, bundle, or markdown products with excessive days of supply.

SaigonFlex UM-96 (491)

Risk 99.8

Reduce receipts, bundle, or markdown products with excessive days of supply.

Shift spend

email campaign

Risk 13.7

Shift spend toward channels with stronger revenue quality and lower order risk.
Estimated impact: 312.0M VND

organic search

Risk 5.4

Shift spend toward channels with stronger revenue quality and lower order risk.
Estimated impact: 261.6M VND

Storytelling thesis for the written answer

The business has real demand but needs CEO action on revenue quality: forecasted peak months increase the cost of stockouts, promotion leakage weakens margin, COD creates failed-demand risk, wrong-size returns damage customer experience, and slow movers tie up capital. The recommendation is to protect margin, shift spend by revenue quality, prepay-incentivize risky payment flows, fix sizing, and rebalance replenishment before the seasonal peak.
